# GAME RULES - ROULETTE

# INTRODUCTION

Roulette is a game of chance where your aim is to guess the next winning number and bet on it or any associated betting option it provides (splits; streets; corners; six lines; dozens; columns; low, high, even, odd, red or black numbers).

If your number wins and you have made a bet on it, you will be paid accordingly. All bets are accepted and paid up to table maximum, meaning if you bet more than table maximum then your excess part of the bet will be returned. That also includes losing bets.

## BETS & PAYOUTS

Your betting options and payout ratios are listed below.

Name of the betting option	Numbers covered & explanation	Payout ratio
Straight Up	1 number covered and it is a winning number	35:1
Split	2 numbers covered and one of them is a winning number	17:1
Street	3 numbers covered and one of them is a winning number	11:1
Corner / First	4 numbers covered and one of them is a winning number	8:1
Six Line	6 numbers covered and one of them is a winning number	5:1
Dozens & Columns	12 numbers covered and one of them is a winning number	2:1
Even Chances (Red, Black, 1-18, 19-36, Even, Odd)	1 number covered and it is a winning number	1:1

We allow bets on Neighbors, Sectors, Complete bets and Dozen Complete bets.

In case of disputes the Manager's decision is final.
